

# FILTRATION

## New ABMF 1600

50% more filter surface

- ▶ More output & better filtration
- ▶ More motor capacity for belt take-off & belt magazine
- ▶ Established and proven ABMF technology

■ 1600 cm<sup>2</sup>

## NEW PRODUCT: BritAS is presenting the ABMF 1600! The Automated Belt Melt Filter with 50% more filter surface.

With the ABMF 1600, we are completing our range of products. We have increased the filter surface by 50 % and can thus meet the requirements of our customers. The ABMF 1600 stands for even more throughput & better filtration!

### ABMF 1600 as of now available – increased output

An increased filter surface does not only improve the total output but supports you for example in case of extremely increasing degree of contamination of your plastic waste, for instance by paper contamination.

### Established and proven technology – optimized inner workings

The ABMF series has proven itself for decades, the technology of the new big ABMF corresponds to the ABMF 1050. For an improved melt flow, we have optimized the inner workings.

### Increased motor capacity for belt take-off & belt magazine

Furthermore, new at the ABMF is the increased motor capacity of the belt take- off and belt magazine.

### The new Melt Filter ABMF 1600 is available as of now!

In the combinations ABMF-1600-12/15/19.
